Evidence of medical neglect in five London deaths

Ladd School

By BRUCE DOOLITTLE AND PETER PARLE

Ladd School's history is described in Medical journals and in the medical profession, with the exception of its famous alumnus, James Ladd, who would not be known for his medical achievements, particularly during the early 20th century. The school's reputation was marred by several controversial incidents, including the deaths of four students over a three-week period in 1970.

The school was founded in 1870 and has a long history of academic excellence, with many notable alumni, including several U.S. presidents. The school's medical faculty was well-recognized, and its students often went on to successful careers in medicine.

The deaths of four students over a three-week period in 1970 raised questions about the school's medical facilities and the care provided to its students. The school's medical staff was questioned, and the school was eventually closed.

The school's reputation was further tarnished by the deaths of an additional two students, one in 1971 and the other in 1972, which prompted an investigation by the medical board. The investigation revealed widespread neglect and abuse of the students, leading to the school's closure.

The school's legacy is a complex one, with both its academic achievements and its dark history. Its closure was a major event in the history of medical education, and its legacy continues to be felt in the medical profession today.

Arab silence masks strong fears Sadaat will recognize Israel, get nothing in return

BRIEFING: The Arab world, excluding Egypt and Syria, is a tinderbox waiting to explode. The Arab leaders, excluding Egypt and Syria, are divided in their views on the possibility of peace with Israel. The Arab world, excluding Egypt and Syria, is a potential source of conflict and instability in the region. The Arab world, excluding Egypt and Syria, is a potential ally of Israel in the face of external threats.
